ANNUAL MEETING WEBSITE

Join us May 28–30, 2025, for the Society for Scholarly Publishing's 47th Annual Meeting

Although every year in the scholarly publishing ecosystem is a balancing act of innovation, optimization, and value creation, 2025 is shaping up to be particularly challenging as the pace and scale of change are accelerating more than we've ever seen before. There is increasing pressure to provide value to and to meet the incredibly diverse needs of the global research community while maintaining financial health for our own organizations, living our values, and continuing to protect the scholarly record. With AI, open access, integrity, and mistrust frequently dominating the conversation, we are in the midst of an unprecedented shift in both our industry and society as a whole.

As always, the SSP community continues to focus on bringing together academics, funders, librarians, publishers, service providers, technologists, researchers, and countless others with a communal interest and stake in disseminating scholarly information. We look to the 47th Annual Meeting as an opportunity to continue this tradition and welcome all colleagues and community stakeholders.

All individual members and staff of organizational members will receive the member discount to attend the Annual Meeting.

Moderated Discussion

Preserving Our Value(s): Scholarly Publishing in a Changing World

In an increasingly chaotic landscape, scholarly publishers must remain committed to their values while adapting to emerging issues. This candid plenary session brings together C-level leaders—from a commercial publisher, a society publisher, a university press, and a library—to explore the critical role of scholarly communication in today's world. Panelists will tackle questions around research integrity, business models, government mandates, AI, and the role of disruptors. Together, they'll examine whether the values that underpin our work continue to benefit society—and what we can do if they don't. Attendees will leave with a realistic view of the challenges ahead, but also a renewed sense of possibility and purpose for how scholarly publishers can adapt, lead, and continue to deliver value in a shifting landscape.

Oxford-style Debate

AI is Fair Use

Over the last two years, we have seen explosive growth in the use of Artificial Intelligence in research and research dissemination, and AI tools and technologies are fundamentally changing our industry on a seemingly daily basis. One foundational challenge with AI is balancing the speed of innovation with the constant need for high volumes of content and proper licensing and remuneration of publishers, authors, and other rights holders for their works. There is a growing body of litigation around copyright and AI in the U.S., and we are starting to see some early decisions. Still, for many in the community, the question remains: Is AI Fair Use?

This Oxford-style debate will see two leaders in our industry debating the resolution "AI is Fair Use," with the winner based on audience votes before versus after the debate. Don't miss this exciting final session for the conference, where your participation will decide the outcome!
